DETAILED ACTION

Allowable Subject Matter

1. Claims 1-39 are allowed.
2. The following is an examiner's statement of reasons for allowance:
 - 2.1 Referring to claims 1-3, 5, 6, 10-17, 19, 20, 23-29, 31, 32, and 35-39 Forde discloses a computer-bases method of applying a set of digital business signing rules for the processing of electronic documents. The method verifies the identity of an authorized user using a predefined verification protocol. Then a set of privileges associated with said authorized user is determined (page 5, lines 7-11). This meets the limitation of "comparing information obtained thereby to the access control rules stored in said database to determine whether the authorized use is authorized to have the document signed." The digital signature is attached to the electronic document (page 5, line 14. Forde also discloses an exemplary list of authorized users and their associated privileges in Table 1 (page 10, line 2), which meets the limitation of "a database holding access control rules that identify documents authorized users are allowed to have electronically signed." However, Forde does not teach that the *signing system signs the documents using signing system authentication information and the signing system authentication information is used to sign the document regardless of which of the plurality of users requested the document be signed.*
 - 2.2 Furthermore, Forde doesn't teach parsing the document. Referring to the instant claims Brown discloses a parser, which parses the document to identify the portion to be signed by the signer (Brown: page 12, last paragraph). However, Brown does not

teach that the *signing system signs the documents using signing system authentication information*.

2.3 Therefore, the combination of Forde with Brown does not render the instant claims obvious.

2.4 Claims 4, 18, 7-9, 21, 22, 30, 33, and 34 were rejected over the combination of Forde and Brown in view Kelly and Lee. The combination of Forde and Brown with either Kelly or Lee does not render the claims obvious, because Forde and Brown do not teach that the *signing system signs the documents using signing system authentication information and the signing system authentication information is used to sign the document regardless of which of the plurality of users requested the document be signed*.

3. In view of the reasons presented herein claims 1-39 are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
